AUTHOR INDEX VOLUME 21

(The issue number is given in front of the page numbers)

Agathoklis, P. and **S. Foda,** Recursive implementation of 2-D finite memory filters (3) 251–260

Benavides, J. I., *see* **E. L. Zapata** (1) 49–60
Boles, W. W., M. Kanefsky and **M. Simaan,** A reduced edge distortion median filtering algorithm for binary images (1) 37–47
Borgefors, G., T. Hartmann and **S. L. Tanimoto,** Parallel distance transforms on pyramid machines: Theory and implementation (1) 61–86

Campbell, T. G., *see* **J. M. H. Du Buf** (4) 289–301
Carazo, J. M., *see* **E. L. Zapata** (1) 49–60

De Vries, F. P. Ph., Automatic, adaptive, brightness independent contrast enhancement (2) 169–182
Demeure, C. J., Fast least squares estimation of amplitude and phase of damped cosines (2) 107–116
Du Buf, J. M. H., Gabor phase in texture discrimation (3) 221–240
Du Buf, J. M. H. and **T. G. Campbell,** A quantitative comparison of edge-preserving smoothing techniques (4) 289–301

Er, M. H., An alternative implementation of quadratically constrained broadband beamformers (2) 117–127

Fathima, S. T. and **B. Yegnanarayana,** A maximum entropy approach to interpolation (1) 17–24
Foda, S., *see* **P. Agathoklis** (3) 251–260
Freedman, M. and **D. Zrilić,** Nonlinear arithmetic operations on the delta sigma pulse stream (1) 25–35

Hartmann, T., *see* **G. Borgefors** (1) 61–86
Hazra, S. N., *see* **M. S. Reddy** (1) 87–91
Hertz, D., Only additions algorithm for locating the frequency of a complex tone (3) 275–280
Hua, Y. and **T. K. Sarkar,** Matrix pencil and system poles (2) 195–198

Jumarie, G., Nonlinear filtering. A weighted mean squares approach and a Bayesian one via the maximum entropy principle (4) 323–338

Kabal, P., *see* **R. P. Ramachandran** (3) 261–274
Kanefsky, M., *see* **W. W. Boles** (1) 37–47
Kim, J. and **I. Song,** A suboptimum quantization–detection scheme using input amplitude compression (4) 315–321

Liu, G., Fourier phase retrieval algorithm with noise contraints (4) 339–347

Lynn Kirlin, R., *see* **L. Torres-Urgell** (4) 303–313

Mehra, D. K., A generalized least squares fast transversal filter algorithm for the decision feedback equalization of dispersive channels (3) 241–250
Moonen, M. and **J. Vandewalle,** Recursive least squares with stabilized inverse factorization (1) 1–15
Moses, R. L., *see* **P. Stoica** (4) 349–350

Plata, O. G., *see* **E. L. Zapata** (1) 49–60
Plotkin, E. I., *see* **D. Wulich** (2) 183–194

Ramachandran, R. P. and **P. Kabal,** Transmultiplexers: Perfect reconstruction and compensation of channel distortion (3) 261–274
Raz, S., *see* **J. Wexler** (3) 207–220
Reddy, M. S. and **S. N. Hazra,** Equiripple approximation design using first order McClellan transformation (1) 87–91
Rivera, F. F., *see* **E. L. Zapata** (1) 49–60
Ronse, C., Why mathematical morphology needs complete lattices (2) 129–154

Sarkar, T. K., *see* **Y. Hua** (2) 195–198
Semyonova, N. Y., *see* **V. Y. Zagursky** (2) 155–168
Simaan, M., *see* **W. W. Boles** (1) 37–47
Song, I., *see* **J. Kim** (4) 315–321
Stoica, P. and **R. L. Moses,** On biased estimators and the unbiased Cramér–Rao lower bound (4) 349–350
Swamy, M. N. S., *see* **D. Wulich** (2) 183–194

Tanimoto, S. L., *see* **G. Borgefors** (1) 61–86
Torres-Urgell, L. and **R. Lynn Kirlin,** Adaptive image compression using Karhunen–Loeve Transform (4) 303–313

Vandewalle, J., *see* **M. Moonen** (1) 1–15

Wexler, J. and **S. Raz,** Discrete Gabor expansions (3) 207–220
Wulich, D., E. I. Plotkin and **M. N. S. Swamy,** Discrete time-varying filter and PLL for synchronous estimation of parameters of a sine signal corrupted by a closely spaced FM interference (2) 183–194

Yegnanarayana, B., *see* **S. T. Fathima** (1) 17–24

Zagursky, V. Y. and **N. Y. Semyonova,** Investigating the nonlinearity of analog–digital converters (2) 155–168
Zapata, E. L., J. I. Benavides, O. G. Plata, F. F. Rivera and **J. M. Carazo,** Image template matching on hypercube SIMD computers (1) 49–60
Zrilić, D., *see* **M. Freedman** (1) 25–35
